27	255, 0, 204
28	255, 0, 153
29	255, 0, 102
30	255, 0, 53

The RGB colour model combines red, green and blue light in various proportions to produce intermediate colours.
Numbers from 0 to 255 determine levels of brightness of each colour producing a triplet of comma-separated values.
